- **Languages:** C/C++, JavaScript, Python
- **Web Technologies:** Node.js, React.js, Express.js, REST APIs, JWT Authentication, Tailwind CSS
- **Databases/Tools:** MongoDB, Git, GitHub, Postman, Vercel, Render, Cloudinary, Google Cloud Storage (GCS)
- **Creative Tools:** Adobe Premiere Pro, After Effects

Projects

EventAlly — College Event Management System   2025
MERN Stack | GitHub
- Developed a MERN stack web application featuring a public event feed and personalized dashboards with JWT-based authentication.
- Implemented smart filtering and interest-based recommendations, enhancing discoverability and engagement.
- Built an admin panel to manage events, users, and analytics via RESTful APIs.

E-Commerce Platform   2025
Full-Stack Web Application | GitHub
- Built a complete MERN stack e-commerce platform with authentication, product management, shopping cart, order processing, and Stripe payment integration.
- Implemented role-based access with customer features (cart, profile, order history) and admin features (product CRUD, order management, dashboard).
- Tech stack: React 18, Tailwind CSS, Vite, Node.js, Express, MongoDB, JWT, Cloudinary, Stripe.

DocuQuery — Intelligent Document Analysis System   2025
Hackathon Project | MERN Stack | GitHub
- Developed an AI-powered document analysis platform enabling semantic search and contextual querying over uploaded documents.
- Built the MERN stack web app: React + Tailwind CSS (frontend), Node.js + Express + MongoDB (backend).
- Integrated teammate's AI APIs to process documents and deliver intelligent query responses in real time.

Achievements

- **JEE Advanced 2023:** Qualified among the top 2% of candidates nationwide.
- **Gold Medalist — Mathematical Olympiad:** Secured 1st place at district level in Grade 10.
